THE SAN FRANCISCO ART ASSOCIATION

The San Francisco Art Association was organized in March, 1872. Its object is the promotion and cultivation of the Fine Arts in the community. In furtherance of these aims, one of its first acts was the founding of an academy for the teaching of drawing, painting, and modeling. This academy, called the California School of Design, has now attained the twenty-eighth year of a most prosperous career. Spring and Fall exhibitions for showing and selling the work of local artists were also planned and have been successfully maintained, while lectures and special exhibitions of works of art are frequently devised for the amusement and instruction of the members of the Association and the public at large. Housed at first in rented rooms of rather inadequate proportions, the conditions of the Association were steadily bettered by the fostering care of its members, until finally, through the generosity of a wealthy patron of art, it entered into possession of the admirable property which it now occupies.

THE MARY FRANCES SEARLES
ART GALLERY

THE MARK HOPKINS INSTITUTE OF ART

This handsome edifice was originally a private residence, built by one of California's pioneer citizens, the late Mr. Mark Hopkins. In after years it passed into the possession of Mr. Edward F. Searles, of Methuen, Massachusetts, who generously gave it to the city and State for the use of the Art Association under the commemorative title of the Mark Hopkins Institute of Art. This transfer was made in February, 1893, by deed to the Regents of the University of California, "for the exclusive uses and purposes of instruction and illustration of the Fine Arts, Music and Literature, or any of them, including the maintenance of galleries, reading rooms, and other suitable means of such instruction and illustration." At the same time the Art Association became affiliated with the University of California, and under the terms of the trust entered upon its occupancy of the property.

The grounds of the Institute are picturesquely situated upon the summit of a high hill, commanding a large view of the city, harbor, bay and adjacent country. The lot occupies about half a block, with a frontage on California,

Mason and Pine streets. The architecture of the building is modern English Gothic in style, its pointed arches, steeply pitched roofs, spires and turrets giving it somewhat of a romantic, castellated effect in keeping with its lofty position. There are thirty-four rooms in the house, exclusive of the labyrinth of underground stone and cement chambers devoted to heating, lighting and elevator plants, storage, etc.

The vestibule of the principal entrance is finished in English oak. The wood work of the office of the Assistant Secretary (A) and adjacent cloak room is of mahogany. The main hall, or reception room, which now, under the title of the House Gallery, contains a part of the Association's collection of pictures and statuary, is a lofty apartment, twenty-five feet wide by sixty feet long, lighted by a double skylight in the roof. The walls are of oak, carved and inlaid with ebony, yamana, and other woods. On the second floor a corridor surrounds this hall, connecting with the second-floor passageways and apartments. This corridor or gallery is walled in by a screen containing eight large paintings, illustrative of various ages and schools of architecture. At intervals are arcaded openings with balconies overhanging the hall beneath, the balcony at the west end being in the nature of an organ loft, a magnificent organ being built into the wall at that

THE

point. From the upper portion of this second-story screen a coved and frescoed ceiling curves upward to the skylight. A grand stairway connects the lower hall with the second floor. At the first landing there is a half story formerly used for a conservatory, but recently rebuilt and made into a water-color room.

Without entering into a systematic description of the various rooms, it may be said that each of the principal apartments of the house is treated in a distinctively characteristic manner.

The Moorish Room (B), on the first floor, is in ebonized oak, with lamps of Oriental make and walls covered with silk tapestry patterned after those of the Alhambra. The Maple Room (D), opposite, is fitted in bird's eye maple with carved cabinets, in the panels of which are paintings representing the seasons; the adjoining Reception Room (E) is in ebony, with cabinet and mantelpiece of ebony, inlaid with various woods, carved and with painted panels, while the contiguous Music Room (F) is in rosewood. These three apartments and the Library open into each other and extend the length of the southern side of the house, the windows giving upon balconies overlooking the city. The Library (G) is finished in Circassian walnut, and lined with elaborately carved book cases, clock case and cabinets. The Ceramic Room (H), formerly the dining room, is in the revived

English Gothic style, known as the "Talbert," and contains richly carved buffets, mantelpiece, ceiling beams and panels of English elm.

On the second floor, the large room in the southwest corner (J) is occupied as a Board Room by the Regents of the University, the fittings being of coco bolas wood, with inlayings of brass. Another spacious apartment on this floor (M) is a reproduction of the state chamber in the castle of the Duke of Milan, the carvings in the bow window of pear wood being exceptionally intricate and graceful. The Curator's office which occupies the southeast corner, is finished in rosewood, inlaid with brass and ebony, the chandeliers being of wrought silver. On this floor are the rooms (T and U) devoted to prints, of which the Institute owns quite a number, the Avery Collection of paintings by early California artists, Room (W), and the collection of Indian baskets and other ware (Room Y), representative of the early history of California.

The apartments on the floor above these are used for storage, painting and repairing, janitor's rooms, etc. The basement, which is elaborately tiled and finished in oak, contains lecture rooms and other apartments connected with the administration of the Institute. In summarizing it is safe to say that, without considering the frescoes, metal work and tapestries, there are few if any houses, either public or private, which

THE
RECEPTION ROOM

contain such a variety of choice natural woods, polished and wrought to such a lustrous finish, so exquisitely inlaid, or carved with such skill, as is to be found in this mansion. Moreover, the mechanical excellence of every part of the house to the minutest detail is such as to excite the admiration of not only professional architects and builders, but the unprofessional visitor as well.

About a year ago Mr. Searles determined to supplement his magnificent gift by the addition of a picture gallery. This annex was begun in May, 1899, and completed in March, 1900, and bears the title of the *Mary Frances Searles Art Gallery*. It extends along the west side of the main building, and is of the same general style of architecture. The interior of the gallery is forty-three feet wide, and one hundred and five feet long, the walls having a height of twenty-two feet, of which fifteen feet is picture space. It is lighted in the daytime by a double skylight, twenty feet wide by eighty feet long, and at night by powerful reflectors contrived especially for the purpose. The south wall of the water-color room, before referred to as being on the half floor at the head of the stairs in the main building, is open, and provided with a balustrade, overlooking the gallery beneath. Lobby, office, and storerooms complete the equipments of this excellent addition.

A separate building for the School of Design occupies the southwest portion of the grounds, the entrance being on the corner of Pine and Mason streets. The house is a large one of three stories, and is well adapted to the purposes for which it is used. A description of the school and a list of the courses of study pursued will be found at the end of the catalogue.

VISITORS WILL BE FURNISHED WITH ANY INFORMATION THEY MAY DESIRE IN THE OFFICE OF THE ASSISTANT SECRETARY, ROOM A, ON THE FIRST FLOOR ❀ ❀ ❀ ❀

The regular school year opens on the first Monday in August and closes on the 15th of May in the following year, and is divided into two terms of four and one-half months each. A vacation of two weeks occurs during the holidays between the two school terms.

Students are classed as regular and special. Regular students are those who follow the prescribed academic course; they must attend the school at least one year before entering the competitions and examinations for the University of California certificate. Special students are those who attend the Saturday or Night classes or take a special course in drawing, painting or modeling, only, in the regular daily classes.

Students on entering the school will be placed in the Preparatory Drawing Class, unless studies are submitted, entitling them to enter a higher course.

REGULAR OR ACADEMIC COURSE

ELEMENTARY DRAWING—A class especially for beginners.

PREPARATORY DRAWING—Classes in drawing and modeling from the antique and casts from life.

ANTIQUE DRAWING—Classes in drawing and modeling from the antique.

LIFE CLASSES, (separate classes for men and women)—For painting, drawing and modeling from the figure.

PORTRAIT CLASSES, (separate classes for men and women)—For painting, drawing and modeling from the head, or the figure in costume.

COMPOSITION CLASSES—Classes in design in each special course.

PERSPECTIVE CLASS—A course of lectures on perspective, illustrated, with instructions in its practical application.

ANATOMY—A course of lectures, demonstrated by models, charts, etc., with text books.

PROPOSED ADDITIONAL COURSES

HISTORIC ORNAMENT—A course of study from casts of historic ornament: Egyptian, Assyrian, Greek, Roman, Gothic, Renaissance, etc., with lectures and text-book instruction:

DECORATIVE DESIGN—A course of study of natural forms with their application to surface and other decorative purposes.

THE HISTORY OF ART—A lecture and text-book course.

The course in Historic Ornament and Decorative Design, as applied to the Industrial Arts will be commenced when the number of applicants for instruction in these branches warrants the formation of a class. Instruction in any special study is dependent upon the number of pupils being sufficient to warrant the maintenance of a class, the Board of Directors reserving the right to withdraw any study from the course, when, in its opinion, the attendance is insufficient to justify its continuance. The lecture and text-book course in the Ancient and Modern History of Art has been provided for, and will be undertaken during the term.

All work done in the school will be the property of the Association until the close of the school exhibition at the end of the school year, and must not be removed from the building without permission.
